

Environmental Policy

RMI Pressure Systems Ltd (RMI) is a specialist designer and manufacturer of high pressure pumps, pumping systems and ancillary equipment for mining and industrial applications. We also provide related installation and repair services. We are committed to being a leader in quality within this industry for the designs, products and services we provide.

RMI will maintain an Environmental Management System, as part of its Integrated Management System, in accordance with the requirements of ISO14001. Consideration of environmental issues will be taken into account when producing our Company's aims and objectives.

We are committed to:

- Conducting regular management reviews of our environmental performance, including reviewing this policy and our objectives and targets which contribute to achieving continual improvement
- Complying with applicable environmental legislation and any other requirements
- Ensuring openness of our environmental activities with all stakeholders including employees, customers, suppliers and regulators
- Providing continual training, and involving all employees in our environmental improvement programme
- Working with our customers to produce products which can contribute to reducing their environmental impacts
- Minimising waste through reuse and recycling, sending waste to landfill as a last resort, and ensuring safe disposal when no viable alternative is available
- Minimising energy usage by involving all members of staff in energy conservation initiatives
- Preventing pollution through training and education

This policy is not in any way restricted and is available to anyone requesting a copy, including members of the public.
